

MS Teams (Desktop and Browser)

Summary: This course is designed to help you master Microsoft® Teams®, the key communications tool in the suite of Microsoft 365 productivity apps. Microsoft Teams enables individuals and organizations to chat, share ideas, collaborate on files, and essentially, work together. You can use Teams to have a quick chat with a colleague, participate in a virtual meeting, make an online call, and share files and resources. The Microsoft Teams app is available in three versions: a desktop app, a web app, or a mobile app. Once you are familiar with the Teams desktop app, you can easily transfer that knowledge and work in the web and mobile apps to take advantage of connecting through Teams wherever your work takes you.

Course Objectives: In this course, you will use Microsoft Teams to chat, post, initiate calls, and participate in meetings. You will:

- Use chat messages and posts to communicate with the team.
- Initiate, join, record, and screen share in calls and meetings.
- Share and work with files and apps.
- Create a team and configure channels and tabs.

Target Student: This course is designed for people who need to use Microsoft Teams to communicate, share files, and conduct online meetings with colleagues. No experience with Teams is required; however, a basic understanding of Office apps will be useful.

COURSE CONTENT

Lesson 1: Communicating with Microsoft Teams

Topic A: Navigate in Teams

Topic B: Chat with Contacts

Topic C: Post in Team Channels

Lesson 2: Calling and Meeting in Teams

Topic A: Use the Teams Call Feature
